Subject: Final Report
TDD No. F3-8403-07
Rhinehart Tire Dump
Winchester, Virginia

Dear Mr. Byer:

Submitted herewith is a final Site Inspection report for the subject project.

Based on our review of available data, we have concluded that EPA should consider the following:

- o On February 13, 1984, the site owner consented to a C.E.R.C.L.A. Section 106 Order issued by EPA requiring control of runoff on site. EPA should monitor activities at this site to ensure compliance with this Consent Order agreement.

The Rhinehart Tire Dump is located in a ravine, approximately 600 feet long by 375 feet wide with depths ranging from 20 to 40 feet. On October 31, 1983, a fire occurred at the site causing the combustion process to generate thousands of gallons of hazardous liquids and toxic gases.

If you have any questions, please contact me.

Respectfully submitted,
